Personal Profile

I have leadership, planning and estimation experience as well as advanced PHP programming skills especially with regards to providing elegant Drupal solutions for any given project.

Having worked in many positions both in large teams and in smaller operations I am happy, confident and productive in almost any situation and always aim to provide the most efficient possible solution to any given problem whether that be through custom development or the correct usage of contributed modules or third party services.

Employment History

Wonga.com

Drupal Developer Lead

August 2012 - March 2014 (Perm)

My role at Wonga was varied, my main responsibilities were as lead Drupal developer on the projects I worked on, estimating, planning, developing, testing and reviewing as well as being website representative for quarterly and sprint planning.

As part of a large agile team of mainly C# developers, product owners and business stakeholders, I was the lead Drupal developer for a new point of sale product called PayLater as well preparing a Drupal website to replace the old .NET wonga.com site and adapting this wonga.com Drupal site to provide the new features as required including the Instalment Loan product they will be offering shortly as a direct replacement for the old (single instalment) loan product.

Skills used: APIs, Agile, Apache, BDD, CD, CI, CSS, Confluence, Context, Crucible, Ctools, Custom module development, Delivery, Drupal, Drush, Estimation, Git, Go, HTML, JSON, Java, JavaScript, Jenkins, Jira, Jquery, Leadership, Leverage of Contrib modules, Linux, Maven, MySQL, Nginx, Open Source, PHP, PHPUnit, Panels, Planning, Selenium, Simple Test, TDD, Theme Development, Ubuntu, Views, XML.

Tigerfish
Back End Drupal Developer
2010 – August 2012 (Perm)
My role at Tigerfish was as a back end Drupal developer in a small team of 3 developers and 2 designers/themers, handling around 100 sites, liaising with clients about their needs and desires to the planning, estimation and delivery of new projects as well as supporting and maintaining existing projects.

The majority of the work was client management, planning, custom development and knowing when to use existing modules as well as when to implement a tailored solution.

Skills used: APIs, AWS, Agile, Apache, BDD, CSS, Context, Ctools, Custom module development, Delivery, Drupal, Drush, Entity, Estimating, Git, HTML, JSON, JavaScript, Jquery, Leverage of Contrib modules, Linux, MySQL, Open Source, PHP, Panels, Planning, SEO, SVN, Simple Test, Theme Development, Ubuntu, Views, W3, XML, waterfall.

eCommerce Associates
ASP/Web Developer
2007 – 2010 (3 month contract that extended to nearly 3 years)
My role in eCommerce Associates was as a classic ASP programmer and web developer, managing the existing suite of affiliate sites as well as creating new SEO friendly sites to generate affiliate revenue. As part of this role I managed every aspect of the sites from planning, instructing the designers, content procurement & management, programming, deployment and hosting. The majority of work for eCommerce was developing strong SEO driven consumer sites before the Google Panda updates.

Skills used:APIs, CSS, Delivery, Estimating, HTML, JSON, JavaScript, Jquery, Planning, SEO, SQL, W3, XML, waterfall.

Summit Media
Online Marketing Manager
2004 – 2007 (Perm)
I joined Summit Media as an online media novice in 2004. Whilst there I developed my interest in marketing and web strategy and began to learn the skills I have today. I worked on the PPC campaigns for Play.com and Gameplay.com as well managing affiliates for Gifts.co.uk and working on SEO of sites under Summit management.
